

# Morris County Office of Emergency Management

*invites you to attend the following course offering:*

## **LAW ENFORCEMENT AND FIRST RESPONSE- TACTICAL CASUALTY CARE (LEFR-TCC)**

**8:00AM-4:00PM**

**LOCATION:** MORRIS COUNTY OFFICE OF EMERGENCY MANAGEMENT- PUBLIC SAFETY COMPLEX- 3<sup>RD</sup> FLOOR, 500 W. HANOVER AVENUE, MORRISTOWN NJ 07960

**Law Enforcement and First Response- Tactical Casualty Care (LEFR-TCC)**, is continuing education offered through NAEMT's PHTLS program. It teaches public safety first responders (police, law enforcement officers, firefighters, and other first responders) the basic medical care interventions that will help save an injured responder's life until EMS practitioners can safely enter a tactical scene. The course is offered through a combination of classroom education and practical scenarios under stressful circumstances with the use of highly technical simulation aids in an austere environment, making this course a unique training opportunity.

The course combines the principles of PHTLS and Tactical Combat Casualty Care (TCCC), with the training provided to military medics by all branches of our Armed Services. It is consistent with the Tactical Emergency Casualty Care (TECC) guidelines, and meets the recommendations of the Hartford Consensus Document on Improving Survival from Active Shooter Events.

Course participants will learn life-saving medical actions such as bleeding control with a tourniquet, bleeding control with gauze packs or topical hemostatic agents, and opening an airway to allow a casualty to breathe.

Upon completion of the course participants will:

- Understand the rationale for immediate steps for hemorrhage control (including external hemorrhage control, direct pressure and wound packing, early use of tourniquet for severe hemorrhage, internal hemorrhage control by rapid evacuation, and transportation to major hospital/trauma center.
- Demonstrate the appropriate application of a tourniquet to the arm and leg.
- Describe the progressive strategy for controlling hemorrhage.
- Describe appropriate airway control techniques and devices.
- Demonstrate the correct application of a topical hemostatic dressing.
- Recognize the tactically relevant indicators of shock.
- Understand the correct application of a chest seal.
